DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks, filed June 29, 2006, with respect to the rejection(s) of claim(s) 7-10 under 35 USC 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of US patent no. 6,212,176.

Claim Rejections - 35 USC § 103

- 2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 3. Claims 7-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Andersson et al (US 6,212,176).

Andersson et al discloses a means and method for forming logical channels and a means for mapping the logical channel to a physical channel and a means for transmitting the logical channel signals over the physical channel. See Control Channel Transceiver in Fig.4.

Andersson et al further teach that each logical channel includes information and an error detecting code, i.e., CRC. See Fig. 9.

Andersson et al fails to teach that the number of radio frames (slots) of a fixed duration increases the transmission rate of the physical channel decreases.

Since each slot can carry less amount of information when the transmission rate of the physical channel is lowered, it would have been obvious to one skilled in the art increase the number of time slots in order to ensure the same amount of data to be transmitted.

Application/Control Number: 10/673,940 Page 3

Art Unit: 2611

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Y. Kim whose telephone number is 571-272-3039. The examiner can normally be reached on 8AM --5PM M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jay Patel can be reached on 571-272-2988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
